

Dear Sir

BOTANIC GARDEN, CAMBRIDGE, MASS.

Nov. 18 1873

Very many thanks  
for the notes of Cypripedium  
arietinum. Nothing  
could be more welcome.  
Please keep an  
eye on your correspond-  
ent, that he may  
send more next year.

The "Aster" is the  
Baccharis halimifolia  
As to the

Ostrychium breake,  
I advise you to  
ask about it of  
Mr. Robinson of  
Salmon, - who keeps  
well the run of  
these things.

Very truly Yours

Bradway
